**CITY OF TEMPE, ARIZONA  
PROPOSAL OF SERVICES, BUDGET AND SCHEDULE  
AIRCRAFT NOISE IMPACT EVALUATION  
June 19, 2008**

## **SCOPE OF SERVICES**

### **Project Understanding**

Communities in the vicinity of major air carrier airports frequently have serious compatibility issues concerning airport noise. Current federal standards for noise compatibility are inadequate to address these more widespread concerns, complaints and the reported levels of annoyance of residential neighbors. Although aircraft have become quieter on average over the last 40 years, there have been vast increases in the frequency of service offsetting much of the improvement.

In addition to the increasing frequency of noise events, no real direct controls on the level of volume, timing or pricing of air service exist other than through direct action of the airport proprietor. Usually, given the constraints expressed in the airport grant assurances, proprietors are disinclined to establish limits or restrictions.

Community leadership in towns and cities proximate to an airport has virtually no regulatory power whatsoever, strictly limiting the potential to achieve relief for residents. Annoyance levels, stoked by continuing loud aircraft noise events, redoubles in the realization that little can be done to bring about improving circumstances.

While the airport and air travel industry points to the massive economic benefits that accrue in the wake increasing passenger and cargo demand, this is a regional benefit. The attendant environmental impacts, however, fall disproportionately on those situated close to the airport such as in the City of Tempe.

The collateral issues that increase such community residents' concerns and frustrations include the actual level of individual noise events, often leading to speech interference events; the timing of those events, especially during the night period, i.e., sleep interference events; and the continuing expansion of travel volumes. These concerns are especially serious in warm climates that accommodate increased opportunities for outdoor living, and for those who spend most of their time at home such as the mothers of young children and retirees. More recent evidence has also shown disproportionate effects on schools and the learning process.

*DR for  
PB 6/18*

For these reasons, intergovernmental relations tend to become strained and an atmosphere of mistrust between residents and the respective authorities tends to develop preventing satisfactory communications and understanding.

The work program set forth below is intended to establish a common understanding of the facts of the situation as it exists in the City of Tempe and evaluate options for improvement.

### **Task 1 – Review and Correlate Aircraft Noise Impact**

#### **Task 1.A – Obtain and Review Aircraft Noise Monitoring Records**

Conduct a project kick-off meeting with representatives of the City of Tempe and the Tempe Aviation Committee (TAVCO) in order to review the objectives of the study and the scope of services. This meeting will be followed by on-site data collection and review as described in Tasks 1.B and 1.C.

Records of airport noise monitoring data from sites within the City of Tempe will be obtained and reviewed. This will include a suitable period before and after the recent construction of Runway 7R-25L. Each site will be field inspected to understand the character of the area and its relation to the established flight tracks. Comparisons will be made to determine the long-term net change and, depending on the available array of measurement parameters, each site will be characterized and the long-term trend will be determined.

#### **Task 1.B – Obtain and Review Relevant Airport Data**

Traffic levels, schedules, changes in airport or flight track layout will be reviewed to provide a narrative specifying factors that may have occurred during the recent past that have the potential for affecting the monitored noise levels. This information will be used to better understand any apparent links between changes in the physical layout of the Airport, changes to the flight tracks or changes in service levels that result in differing levels of noise impact through time.

#### **Task 1.C – Compare Past Cumulative Noise Impact Levels with Most Recent Year of Record**

Essential to understanding current circumstances is a measurement of whether aircraft noise impact has grown during the intervening years since the last official noise contour was developed. The Area Equivalent Model (AEM), a derivative of the Integrated Noise Model, will be used to assess the change that may have occurred. This spreadsheet exercise compares the area of cumulative noise level within the key noise contours of concern between any two given cases. The City of Tempe will provide the key input data for a selected past year of record and the most recent year of record. This data will include annual average or daily average volumes of aircraft landings and takeoffs specified by specific aircraft type and by day night split (the fraction of traffic occurring between 10:00 p.m. and 7:00 a.m.) After assigning the fleet mix found to occur into AEM representative types, the data will be entered into the AEM resulting in a comparison in square miles of the total areas contained in the contour levels of interest and indicating whether noise cumulative impacts have increased or decreased between the two cases studied. These results, together with the review of changes to airport layout and flight track

placement, will lead to a recommendation concerning whether the change has been sufficient to warrant further detailed study with the INM or other action.

#### Task 1.D – Obtain and Review Noise Complaints

Noise complaint records made to the Airport or to City authorities will be reviewed to determine the issues of significance from the point of view of the receptor population based on an understanding of the variations found in noise monitoring records. Any relevant noise measurement data available from third parties will be obtained, compared with official measurements and any differences found will be analyzed and, to the extent practicable, be resolved.

This subtask will also provide for a review of existing governmental agreements, data transfers and pertinent public policies.

#### Task 1.E - Summarize and Analyzed Data Obtained

Based on the records and opinions obtained and in light of instructions from the City of Tempe, a working paper will be prepared summarizing the findings.

### **Task 2 – Noise Monitoring System Expansion and Intergovernmental Agreement**

#### Task 2.A – Review Existing Noise Monitoring Sites

Based on field inspections carried out Task 1.A and reviews of the noise monitoring data, each existing site will be characterized in terms of its continuing utility and effectiveness in depicting the pattern and severity of aircraft noise impact in the City of Tempe, reflecting the current runway utilization at the Airport.

#### Task 2.B – Develop Recommendations for Site Relocation or Additional Sites.

Based on data developed in Task 1.A and 2.A and other data, a review of potential new sites or sites for redeployment of existing aircraft noise monitors will be made. This will include specific locations designated on street maps. Each site will be characterized in terms of land use and site characteristics in light of the technical specifications of the existing noise monitoring system or expected near terms changes in equipment capability.

#### Task 2.C - Draft Final Report

Based on information developed in the tasks above as well as opinions and directions from the City of Tempe, a list of recommended improvements will be furnished in a draft final report that will incorporate the material presented in the first working paper.

#### Task 2.D – Meeting with City, TAVCO and Airport, and Final Report

At the conclusion of subtask 2.C, a meeting with the City of Tempe representatives and TAVCO will be held to review the draft final report and its recommendations for action. That meeting will be followed by a meeting with representatives of the Airport. The draft report will then be finalized.

#### **BUDGET**

The above services will be provided for a lump sum budget of \$37,400. Monthly invoices will be submitted on a percent of work-accomplished basis. Payment is due within 30 calendar days of receipt.

#### **SCHEDULE**

The services are anticipated to be completed within three calendar months of receipt of a notice to proceed.

### **Guidelines for Implementation of Health Insurance**

These Guidelines are provided for purposes of implementing Resolution No. 2000.73, which requires all employees of prime consultants, general contractors and major subconsultants and subcontractors to have health insurance and to offer health insurance to their eligible dependants, as determined at the start of each project. Questions regarding these guidelines should be directed to the City of Tempe Engineering Division at (480) 350-8200.

1. All Prime Consultants who enter into a Public Works contract or General Contractors who bid on Public Works projects that are advertised for bid and enter into a contract in excess of \$30,000 with the City of Tempe after January 1, 2001, are required to sign an affidavit in the form attached hereto. The prime consultant or general contractor shall require that all major subconsultants or subcontractors, defined as entities doing work in excess of \$30,000, comply with the health insurance requirements. In signing the affidavit, prime consultants and general contractors may refer to and rely upon these Guidelines for interpretation.
2. Health insurance is required for permanent employees who work for the consultant/contractor more than one hundred and twenty (120) days in any calendar year. A "work day" consists of any time within a twenty-four hour period, regardless of number of hours, that the individual is paid. This requirement excludes students working part-time who are enrolled in a recognized educational institution. Many companies have a grace period or a qualifying period prior to commencement of insurance coverage, which is acceptable so long as the employee coverage begins by the 120<sup>th</sup> day of contract signing. Temporary employees will be covered to the same extent as the City of Tempe covers temporary employees as determined at the start of each project.
3. If a contractor is a "Union" shop and withholds union dues from employees for health insurance coverage that is also offered to their eligible dependents and meets all City requirements, the Contractor may so note on the required affidavit.
4. The health insurance requirements herein apply to all employees that are directly involved with the City of Tempe project including support and administrative personnel.
5. Health insurance coverage must be maintained during the entire time of the contract, including any warranty periods, with the City.
6. All complaints concerning violations of the health insurance requirements shall be filed by an employee, in writing, with the Public Works Department, within thirty (30) days from discovery of the violation. An administrative hearing will be held before the Public Works Manager, and a written decision of findings will be provided to the parties to the hearing within ten (10) days thereafter. Appeal from the decision

of the Public Works Manager may be made within ten (10) days of the date of the decision by filing a notice of appeal in writing with the Public Works Department. If an appeal is timely filed, an administrative hearing will be held before an administrative hearing officer appointed by the City Manager. The decision of the administrative hearing officer shall be final.

7. In the event of a finding by the City of a violation of the insurance provisions, the company in violation of the provision shall be barred from bidding on, or entering into, any public works contract with the City for a minimum period of three (3) years.
8. All consultants and contractors subject to the health insurance requirements shall post, in English and Spanish, notice of the health insurance requirements at their office and at the job site. Signs for posting will be provided by the City.

These "Guidelines for Implementation of Health Insurance", issued and dated this 21st day of August, 2002, hereby amend all guidelines previously issued.
